

Manual

A. User Manual for Each Feature

FEATURE	STEPS
Setup Wizard	1. Enter your MySQL Username 2. Enter your MySQL Password 3. Click Test Connection to verify credentials 4. Click Next 5. The schema will always be created automatically 6. Check Load built-in seed data if you want sample recipes and demo accounts (pre-checked by default) a. Demo accounts: angela, carl, elizah — password: password123 7. Click Initialize & Finish 8. The wizard closes automatically on success and the app loads
Authentication (Login / Register)	1. Launch the app — the Login dialog appears. 2. To sign in: enter Username and Password → click Sign In. 3. To create an account: click Register → fill in Choose a username (min. 3 characters), Password (min. 6 characters), and Confirm password → click Create Account. The app logs you in automatically on success. 4. The main window opens and your username appears as a  username button in the top-right. Click it to reveal the Logout option.
Recipes (Browse / View / Add / Edit / Delete)	1. Open Recipes from the sidebar (default view on login). 2. Search by title or category using the search field. 3. Add a recipe: ○ Click Add Recipe (next to the search bar). ○ Fill in Recipe title, Total time, Category, and Steps to follow. ○ Add ingredients: click + Add ingredient, then set the quantity, unit (dropdown), and ingredient name per row. ○ Click Save Recipe. 4. Edit: click the  icon on a recipe card → update the fields → click Update Recipe. 5. Delete: click the  icon on a card → confirm deletion. 6. View details: click the recipe card body (not the icons) to see its ingredients and steps; click Back to return.

Pantry (My Pantry)	1. Open My Pantry from the sidebar. 2. Add ingredient: click + Add (next to the search bar) → the Add Ingredient dialog opens → enter name, quantity, and unit (unit is auto-suggested based on the name) → click Add to Pantry. 3. Edit: click the  icon on a card (or double-click the card) → update quantity and/or unit (ingredient name is locked) → click Update. 4. Remove: click the  icon on a card → confirm removal. 5. To find recipes you can cook with your current pantry: click Match Recipes (next to the search bar) to jump to Suggestions.
Recipe Suggestions (Recipe Matching)	1. Open Suggestions from the sidebar. 2. Suggestions load automatically when the panel opens — no manual refresh needed. 3. Use the filter buttons to narrow results: All / Ready to Cook / Partial Match. 4. Review each card: the progress bar shows the pantry match percentage; missing ingredients are listed under Still needed. 5. Assign a recipe to the meal planner: click Assign to Plan on a card → pick a date and meal slot (Breakfast / Lunch / Dinner) → confirm.
Weekly Meal Planner	1. Open Meal Planner from the sidebar. 2. Navigate weeks with ◀ Prev week / Next week ▶. 3. Assign a recipe to a slot: ○ Click an empty slot → click Assign Recipe → choose a recipe → click Select Recipe. ○ Click a filled slot to get options: Change Recipe or Clear Slot. ○ Or assign directly from a Suggestions card via Assign to Plan. 4. Drag a filled slot to another slot to move it (empty target) or swap it (filled target). 5. Auto-Generate Week: click Auto-Generate Week → confirm → empty slots are filled automatically from your recipes (existing assignments are kept). 6. Clear Week: click Clear Week → confirm to remove all entries for the current week. 7. Export CSV: click Export CSV (enabled only when the week has entries) → a file chooser opens to save the plan.
Grocery List	1. Open Grocery List from the sidebar. 2. Adjust the From and To date spinners if needed (defaults to the current Monday–Sunday).

	3. The list generates automatically on open. Click Generate List to refresh after changing the date range. 4. Results appear in a table: Ingredient Quantity Unit Note — showing only the ingredients your pantry doesn't already cover for the planned meals. 5. Export CSV: click Export CSV (enabled once results exist) → choose a file name and location (.csv extension is added automatically if omitted). 6. Print: click Print (enabled once results exist) → the table is sent to a printer.
CSV Export (Meal Plan & Grocery)	1. From Grocery List: after generating a non-empty list, click Export CSV. 2. From Weekly Planner: click Export CSV in the planner nav bar (enabled only when the week has entries). 3. In the file chooser, pick a location and file name; .csv is appended automatically if omitted. 4. On success: ○ Grocery List shows a confirmation with the row count and the full saved file path. ○ Weekly Planner shows a confirmation with the row count and filename only. Format Meal plan: None Date,Meal Type,Recipe Title,Prep Time (mins) 2026-05-18,Breakfast,Classic Scrambled Eggs,10 2026-05-18,Lunch,Garlic Butter Chicken,25 2026-05-18,Dinner,Pork Adobo,60 2026-05-19,Breakfast,Garlic Fried Rice,15 Grocery list: None Ingredient,Quantity,Unit Bread,8,slice Butter,19,tablespoon Cheese,2,cup Chicken breast,12,piece

B. Using the Installers

1. Go to this [Github Repository](#) and download it as a ZIP file.
2. Extract the files from the ZIP file.
3. Go to the installers directory.
4. Launch the application by double-clicking **le-festin.exe**. Alternatively, extract **jar_installer.zip** then double-click **le-festin.jar** to launch the application.
